SOLID FUELS

Please note that due to significant increases on all "Traditional Housecoal", we are no longer stocking or supplying this fuel.

We do however stock a range of Smokeless Fuels & Kiln Dried Logs. If you would like more information or advice on which fuel may suit you best, then please do get in touch.

SMOKELESS FUELS

All of our smokeless fuels are approved to be burnt in accordance with DEFRA and the Government's "Clean Air Strategy" that came into force in May 2021.

All products are available in 50kg open sacks (to be tipped into a coal bunker / shed) OR 20kg sealed plastic bags.

Oxbow Red (MSF0157) is our best selling fuel and is now an Approved Smokeless fuel to comply with the Governments "Clean Air Strategy" from 1st May 2021.

Described as a "Duck Egg" in shape, this man made fuel is a long lasting alternative to traditional house coal. It can be used on open fires and multi fuel stoves & appliances.

Oxbow Excel (MSF0154) is another one of our best selling Approved Smokeless fuels.

More square in shape than Oxbow Red & New Heat, Excel has been approved as a smokeless fuel by DEFRA. It is also HETAS approved to be used on multi fuel stoves, open fires and closed appliances.

Oxbow - New Heat (MSF0155) is alternative man made fuel to Red & Excel.

Similar in shape to Red, New Heat was originally designed to be used on multi fuel stoves and closed appliances, but it has been adapted over the last couple of years so that it can be used on open fires too. Just like Excel, New Heat is authorised to be used on multi fuel stoves, open fires and closed appliances.

Stovesse / Anthracite is a naturally smokeless fuel known as "Black Diamond".

Also known as Boiler Fuel/ Nuts, this natural alternative to the man made smokeless fuels is currently sourced from Wales. It is recommended for use on multi fuel stoves and closed appliances as well as range cookers such as Aga's and Rayburn's.

Anthracite Grains another naturally smokeless fuel known as "Black Diamond".

Originating from Welsh mines like the Stovesse, Grains are only recommended to be used on gravity fed heating boilers.

PRICES & PRODUCTS

KILN DRIED LOGS

We offer a range of kiln dried hardwood logs for both local delivery and collection from our yard. All of our firewood products are responsibly sourced.

Kiln Dried Hardwood (WS207) Our kiln dried logs vary in species depending on availability but mainly we stock Ash, Oak & Hornbeam. These species are the best available in terms of heat output, calorific value and they burn longer than other species! They are ideal for use in pizza ovens, chimineas and fire pits as well as on multi fuel stoves and open fires.

Our kiln dried hardwood logs are available to buy in nets, barrow bags or bulk bags – loose loads can be arranged on request.

Please note that this is a drop off service only – we can drop off / tip as close to your log store as we can get.

Hotmax Heatlog's (WS113) Sold in 20kg sealed bags, Hotmax is a high density, natural saw dust log which is made from compacted, natural and recycled wood dust – a waste product in the manufacture of horse bedding! They can be used on open fires, multi fuel and wood burning stoves as well as on chimineas, fire pits etc. and generate very high levels of heat very quickly. Please note the bags need to be stored in a dry area as added moisture can affect the way they burn.

Available in 20kg or 10kg bags

Kindling Produced by ourselves, our softwood kindling is a perfect for getting your fire started.

£4.50 per net OR 3 for £12

Firelighters Our Fireglow firelighters are quick to react as well as long lasting and come in boxes of a 24 piece block which can be snapped off into strips or cubes.

£1 per box OR 6 for £5
